

Redmine - Defect #6191

Deletion of a main task deletes all subtasks

2010-08-22 18:55 - Be Fio

Status:	Closed	Start date:	2010-08-22
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	Issues	Estimated time:	0.00 hour
Target version:	1.0.2	Affected version:	
Resolution:	Fixed		
Description Apparently cascading update/delete is active for tasks plus their subtasks. That's probably not intended - especially due to the fact that the application doesn't state that fact anywhere (e.g. dialog upon deletion). Also the views don't suggest such a "tight" binding of subtasks to their according parent-tasks.

Associated revisions

Revision 4105 - 2010-09-20 04:55 - Eric Davis

Updated issue delete confirmation when it has child issues. #6191

History

#1 - 2010-09-13 21:30 - Mischa The Evil

Confirmed on latest trunk. This should at least be mentioned upon deletion IMHO...

#2 - 2010-09-13 22:24 - Eric Davis

- Category set to Issues
- Target version set to 1.0.2

Agreed, lets add a message about that for now. Once I've finished cleaning up the REST API, I'd like to "finish" up subtasks.

#3 - 2010-09-20 04:55 - Eric Davis

- Status changed from New to Resolved
- Assignee set to Eric Davis
- % Done changed from 0 to 100
- Resolution set to Fixed

Updated the confirmation message when deleting an issue with children. I left the bulk delete message alone, it already prompts about multiple issues. [r4105](#)

#4 - 2010-09-20 05:51 - Eric Davis

- Status changed from Resolved to Closed

Merged into 1.0-stable for release in 1.0.2
