

Redmine - Feature #6211

Make WikiWords and acronyms as wiki links

2010-08-25 17:04 - Željko Troglić

|   |        |                        |            |

| <b>Priority:</b>  | Normal | <b>Due date:</b>       |            |
| <b>Assignee:</b>  |        | <b>% Done:</b>         | 0%         |
| <b>Category:</b>  |        | <b>Estimated time:</b> | 0.00 hour  |
| <b>Target version:</b>  |        |                        |            |
| <b>Resolution:</b>  |        |                        |            |
| <b>Description</b>  |        |                        |            |
| To reduce work and troubles with sloppy users, it would be really helpful to introduce automatic links for: |        |                        |            |
| <ul style="list-style-type: none"><li>• WikiWords</li><li>• acronyms</li></ul>                              |        |                        |            |
| Examples:   |        |                        |            |
| <ul style="list-style-type: none"><li>• ClearCase</li><li>• UDP</li></ul>                                   |        |                        |            |
| That way users do not even have to think about links, they will appear by magic.                            |        |                        |            |
