<b>Description</b>			
<p>both the "graph plugin" and "charts plugin" have the ability to add filters to the stats, but not to the change the comparison graph to time period instead of hours so i can now the progress of a specific feature (i.e number of bugs increasing in the project). I can filter the burndown to hours only while it will benefit me a lot to see the count of bugs being increased of decreased per project. and the "graphs plugin" shows me "Open aging issues" and "Total issues over time" without the ability to filter them which take a huge advantage out of the plugin</p> <p>just a simple modification to be able to set the comparison to issue counts per tracker (i.e number of bugs increasing over time) not only number of hours or total progress of all issues over time</p>
