

Redmine - Defect #6243

sortable issue history / display most recent messages first

2010-08-28 14:05 - Be Fio

Status:	Closed	Start date:	2010-08-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
The issue history should be sortable to allow showing the most recent messages first.			

History

#1 - 2010-08-28 17:41 - Felix Schäfer

- Status changed from New to Closed
- Resolution set to Invalid

You can already add the columns "created" and "updated" to the issue list as well as sort by one of these columns, if you need that view more often you could also save it for reuse later.

#2 - 2010-08-28 17:49 - Felix Schäfer

Sorry, I just realized you probably meant the journals, i.e. the notes and property changes on a single issue view. Have a look at your user preferences, you can choose in what order you want to see "comments", which IIRC affects the journals list on the issue view, as well as the comments in the news and so on.
