

Redmine - Defect #6246

Projects Disorder

2010-08-29 23:02 - Sven Culley

Status:	Closed	Start date:	2010-08-29
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

**Description**

I started upgrading from 0.8.7.stable to 0.8.7.stable  
First of all I got this error and did these steps: <http://www.redmine.org/boards/2/topics/14645#message-16678> with project rebuild  
After that the migration went just fine and I could use redmine.

The only 2 things:  
- The "My Account" says:

NoMethodError in My#account  
Showing app/views/my/account.rhtml where line #23 raised:  
undefined method `editable?' for #<ActiveRecord::Associations::BelongsToAssociation:0x881fe68>

Extracted source (around line #23):

```
20: <p><%= f.text_field :identity_url %></p>
21: <% end %>
22:
23: <% @user.custom_field_values.select(&:editable?).each do |value| %>
24:   <p><%= custom_field_tag_with_label :user, value %></p>
25: <% end %>
26: <%= call_hook(:view_my_account, :user => @user, :form => f) %>
```

and the projects page is not sorted alphabetically:

```
kxxx
- k1xxx
- k2xxx
sxxx
axxx
- a1xxx
- a2xxx
cxxxx
```

How can I get these back sorted?

History

- #1 - 2010-08-29 23:03 - Sven Culley**  
I ment from "I started upgrading from 0.8.7.stable to 1.0.1.stable.4049" of course
- #2 - 2010-08-29 23:53 - Sven Culley**  
- Status changed from New to Resolved  
- % Done changed from 0 to 100
- Everything is fine, the Customer Plugin was responsable for that.
- #3 - 2010-08-30 08:41 - Felix Schäfer**  
- Status changed from Resolved to Closed

- *Resolution set to Invalid*

**#4 - 2011-10-25 12:45 - Arnold Ellison**
