Target version:	Affected version:
Resolution: Duplicate	
Description r4050 If you go to the gantt tab of one of your projects containing the gantt module and use the clear button (to reset filters), the gantt chart is removed as well as the filter form. This results in a blank page (see attachment).	
Related issues: Is duplicate of Redmine - Defect #6473: New gantt broken after clearing issue... Closed 2010-09-23

The error reported was:

```
Processing IssuesController#gantt (for xxx.xxx.xxx.xxx at 2010-10-02 00:00:00) [POST]
  Parameters: {"set_filter"=>"1", "action"=>"gantt", "authenticity_token"=>"XXX", "controller"=>"issues"}
Filter chain halted as [:authorize] rendered_or_redirected.
Completed in 14ms (View: 2, DB: 2) | 403 Forbidden [http://redmine.host.tld/issues/gantt?set_filter=1]
```

Quick patch to fix the issue:

```

 <%= link_to_remote l(:button_clear),
   { :url => { :set_filter => (@query.new_record? ? 1 : nil) },
     :update => "content",
+   :method => :put,
   }, :class => 'icon icon-reload' if @query.new_record? %>
</p>
<% end %>
```

I noticed that the apply button works as expected without the specific param. Is it due to the use of the form-builder or have I missed something?

I spoke too soon... With the above mentioned patch applied I now am being redirected to the *global* gantt whenever I click the "Clear"-link from **within** a *projects* gantt.

#3 - 2010-10-02 02:43 - Mischa The Evil

Nevermind, this issue was already fixed in the trunk ([r4176](#)) for issue [#6473](#).

#4 - 2010-10-02 02:44 - Mischa The Evil

- Status changed from New to Closed

- Assignee deleted (Eric Davis)

- Resolution set to Duplicate

Closed as a dup of [#6473](#).
