Redmine - Patch #6287

character corruption in exporting spent time

2010-09-03 16:02 - Ryo SUETSUGU

Status:	Closed		**Start date:**	2010-09-03
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Time tracking		**Estimated time:**	0.00 hour
Target version:				

Description
UTF-8 encoding is missed for a 'Total' literal at TimelogHelper#report_to_csv. Character corruption occurs on my environment (Japanese setting).

I've just checked 2.3 and it was fixed time ago in r7947 (#8549). Can you confirm?

#3 - 2013-04-03 22:35 - Filou Centrinov

No. I also just checked 2.3 (Revision 11698). CSV exports (issues or time entries) are always ANSI encoded, not UTF-8 encoded.

```
Ruby version            1.9.3 (i386-mingw32)
RubyGems version        2.0.2
Rack version            1.4
Rails version           3.2.13
Active Record version   3.2.13
Action Pack version     3.2.13
Active Resource version 3.2.13
Action Mailer version   3.2.13
Active Support version  3.2.13
```

#4 - 2013-04-03 23:34 - Filou Centrinov

- File timelog_ru.csv added

- File timelog_en.csv added

- File timelog_ja.csv added

I don't know if we talk about the same thing. I was speaking about the data in the cvs file (column header, issue name, time log comments, ...), including the 'Total' literal in the header from the csv export of time report. Independing from which csv export (issues/ time log details/ time log report) the encoding for japanese language profil is not utf-8 encoded.

I notice that, if my profil language is english or japanese the csv-export is not utf-8 encoded, **but** if my profil language is russian I receive an utf-8 encoded csv export. See timelog upload.
