

Redmine - Feature #631

Add Plugin Support for extending the top menu

Description	
<p>Right now plugins can only extend the Project menu ("main-menu"). This is kinda awkward for plugins that work across projects (see my Timesheet plugin for an example).</p> <p>What needs to be done to be able to extend the "top-menu"? Can we just build the "top-menu" using Redmine::MenuManager and hook into it with the Redmine::Plugin.menu method?</p>	

History

Done in r1137. You can now use this in your plugins:

```
Redmine::MenuManager.map :top_menu do |menu|
  menu.push ...
end
```

Two other menus can be extended as well:

- account_menu: the one in the upper-right corner (with login/logout links)
- application_menu: same place as the project menu but rendered when outside of a project (this menu is empty by default)

You can also have a look at lib/redmine.rb
