

Redmine - Defect #6340

Intenert Explorer 6 presentation bug

2010-09-09 12:02 - Terence Mill

Status:	Closed	Start date:	2010-09-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	1.0.1
Resolution:	Wont fix		

Description

I know IE 6 ist quite old and shouldn't be used, but some does - even have to.

lie version.png!

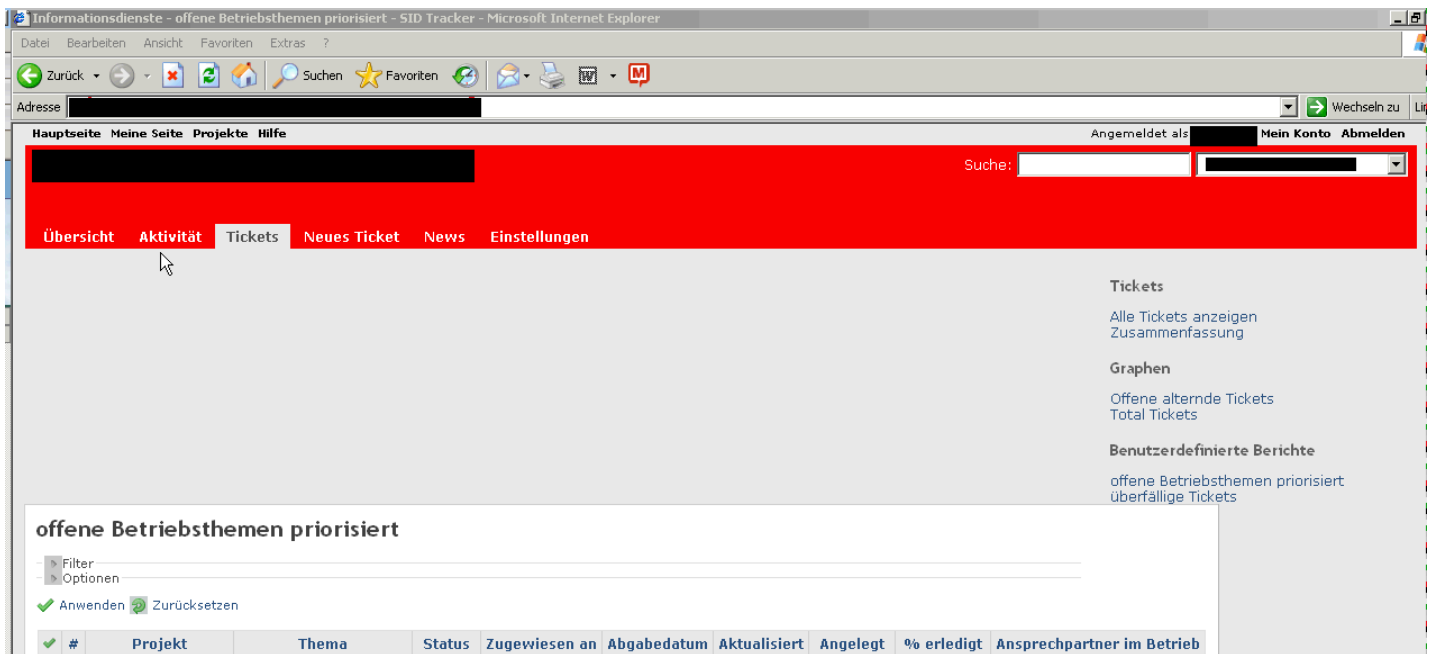

The screenshot shows a Redmine interface in Internet Explorer 6. The page title is "Informationsdienste - offene Betriebsthemen priorisiert - SID Tracker - Microsoft Internet Explorer". The browser's address bar is redacted. The page content includes a navigation menu with "Übersicht", "Aktivität", "Tickets", "Neues Ticket", "News", and "Einstellungen". A sidebar on the right contains links for "Tickets", "Graphen", and "Benutzerdefinierte Berichte". The main content area shows a table header for "offene Betriebsthemen priorisiert" with columns: "#", "Projekt", "Thema", "Status", "Zugewiesen an", "Abgabedatum", "Aktualisiert", "Angelegt", "% erledigt", and "Ansprechpartner im Betrieb". The table body is mostly redacted.

The reports isn't scaled right. On other browser versions (ie8 or firefox) same reports is presented alle right.

-1 IMHO! Google didn't support ie6 anymore, it's not a standard browser, let's evolve!

Think at this:

I know MS-DOS is quite old and shouldn't be used, but some does.

So the work is blocked to text-based ui?

An application CAN have some "system requirements".

They install flash to see youtube why they cannot install chrome or firefox to use redmine?

#4 - 2010-09-09 13:32 - Stefano Gargiulo

*So the world is still blocked at text-based UIs?

#5 - 2010-09-09 14:29 - Felix Schäfer

- *Category set to UI*

I'd say IE6 is not supported.

JB, EDavis, Holger: What do you think?

#6 - 2010-09-10 03:15 - Eric Voisard

-1 IE6 MUST not be supported anymore. It made well enough harm to the standards already.

#7 - 2010-09-11 04:22 - Eric Davis

- *Status changed from New to Closed*

- *Resolution set to Wont fix*

Felix Schäfer wrote:

I'd say IE6 is not supported.

My personal stance on IE6 is:

- I'll make an effort to make sure Redmine is **functional** on IE6
- I will not make an effort to make Redmine **look** the same on IE6
- I will not perform any testing on IE6
- If someone wants to submit a patch for IE6 that doesn't adversely affect other browsers or complicate any of Redmine's code, I'll review it.

This is completely my own stance, based on the limited volunteer time that I have for Redmine (e.g. it can change at any time). Other Redmine contributors may have their own stance.

As for this bug; since it's purely visual, I'm marking it as "won't fix". Feel free to reopen if you can create a patch to fix it.
