

Redmine - Feature #6341

Icons for projects

Description In my opinion it could be nice to have the possibility to specify an icon for each project and to show it in project list (i've a lot of projects (and a lot of nesting) and the full-list is very confusing without visual shortcuts) PS. i suggest to add just an icon url text field into the db and an imageshack or similar link to upload

+1 on this. The ability to have a visual identifier with a project on the projects page, and on activity pages would make browsing much more readable. All of our projects are software products, so it'd be a good fit.
