I need this feature too.

I use: Redmine 1.0.1.devel.4068

Thanks for help!

- Status changed from New to Closed
- Resolution set to Wont fix

Styles are disabled for security reasons, see [FAQ](#). This has also already been discussed in [#5141](#) as well as other tickets and requested in [#5805](#), please use the search in the future to avoid duplicate entries.

Well, its not recent "how" (without Textile Style Tags) the text get colored, but the feature still is needful. So is there need of a feature request or is it impossible to color text without opening vulnerabilities?
