

Redmine - Defect #6370

UTF-8 BOM only partially hidden

2010-09-12 15:31 - Barnabás Králik

Status: Closed	Start date: 2010-09-12
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Attachments	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Cant reproduce	
Description We are using revision r4083 . When displaying a text file (the extension of which is not known by coderay) that is encoded as UTF-8 with standard 3-byte BOM, only the first 2 bytes are cut off and the third byte, bf is rendered as "□". Standard unix xxd outputs the following for the file visible in the attached screen shot: <pre>\$:~/aarghr\$ head -n3 Parser.fs xxd 0000000: efbb bf6f 7065 6e20 5379 7374 656d 0d0a ...open System.. 0000010: 6f70 656e 2053 7973 7465 6d2e 586d 6c0d open System.Xml. 0000020: 0a0d 0a</pre>

History

#1 - 2011-03-29 06:14 - Toshi MARUYAMA

- Category deleted (Core Plugins)

#2 - 2015-10-02 03:25 - Go MAEDA

- File test-result-r14637.png added

- Status changed from New to Needs feedback

No problem in Redmine 3.1.1.devel.14637.

Can we close this?

```
$ xxd -gl text-with-bom.txt
0000000: ef bb bf 66 6f 6f 20 62 61 72 20 62 61 7a 0a 0a  ...foo bar baz..
```

#3 - 2022-01-13 15:13 - Go MAEDA

- Category set to Attachments

- Status changed from Needs feedback to Closed

- Resolution set to Cant reproduce
