

Redmine - Feature #6372

Link to specific revision of file in repository

2010-09-12 15:58 - Barnabás Králik

<b>Status:</b>	New	<b>Start date:</b>	2010-09-12
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Text formatting	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>When writing a comment, I can insert a link to a file in the repository with e.g. <code>source:trunk/app/controllers/issues_controller.rb</code>; I can also insert a link to a specific revision's root, e.g. <code>r4020</code>.</p> <p>However, if I would like to insert a link to a specific version of a file, I have to write the full URL, e.g. <a href="http://www.redmine.org/projects/redmine/repository/revisions/4020/entry/trunk/app/controllers/issues_controller.rb">http://www.redmine.org/projects/redmine/repository/revisions/4020/entry/trunk/app/controllers/issues_controller.rb</a> , or, at least a local one, like "Issues controller @ rev 4020" : <code>/projects/redmine/repository/revisions/4020/entry/trunk/app/controllers/issues_controller.rb</code>.</p> <p>Instead, we could use e.g.</p> <pre>source:/trunk/app/controllers/issues_controller.rb@4020</pre>			

History

... or, even better:

```
r4020:/trunk/app/controllers/issues_controller.rb
```
