Redmine - Feature #6381

Diagnostic mail for rake redmine:email:receive_imap

2010-09-13 14:34 - herbert koelman

Status: New Start date: 2010-09-13 **Priority:** Due date: Normal Assignee: % Done: 0% Category: Email receiving **Estimated time:** 0.00 hour Target version: Resolution:

Description

As it is in version 1.0, redmine:email:receive_imap doesn't log information when something has gone wrong while handling incoming mail.

It would be a plus to reply to the mail's sender with diagnostic message.

Say the referenced project Id in the mail's body was wrong (tag project: pid). Then *redmine:email:receive_imap* would send a mail back saying that the referenced project ID was not found in the database.

The mail could be returned to sender or sender + a redmin administrator.

History

I agree. E-mails to my support address are not being pulled in to Redmine, and I'm left guessing as to exactly why.
