

Redmine - Defect #6384

Target Version contains HTML for one project

2010-09-13 20:54 - Mezz Anon

Status:	Closed	Start date:	2010-09-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

Description

After porting Redmine to a new server, the Target Version when editing or creating an issue contains HTML (See attached image). When changing the target version from the list view (right click->target version) it saves without a problem.

The data looks fine for these versions:

```
mysql> select * from versions where id in (4,69);
```

id	project_id	name	description	effective_date	created_on	updated_on
4	1	2.5	open	2010-10-27	2009-10-30 14:22:52	2010-09-08 13:26:49
69	1	2.6	open	NULL	2010-07-06 08:34:35	2010-09-08 13:27:03

```
2 rows in set (0.00 sec)
```

Redmine [r3559](#)
MySQL 5.1.46
Ruby 1.8.7
Rails 3.0.0, 2.3.5
Rack 1.2.1, 1.0.1

I'm stumped as this exact configuration was working on a previous server..

History

#1 - 2010-09-13 20:58 - Felix Schäfer

I've seen this happen with wrong rails versions, make sure redmine uses the right one.

#2 - 2010-09-13 22:47 - Mezz Anon

Looks like that could be it. In environment.rb its 2.3.5 on the previous server, 2.3.2 on the new one - when changing it to 2.3.5 I get an error 500 however.

I'll compare the gems and go from there.

#3 - 2010-09-13 23:03 - Felix Schäfer

Wait wait wait, you realize what that means: you have an environment.rb on your *new* server that requires an *older* version of rails? I don't think redmine ever required 2.3.2, IIRC it went from 2.2.2 to 2.3.4... You have something *very* fishy going on it seems.

#4 - 2010-09-14 19:32 - Mezz Anon

Updated to [r4084](#).

Gems:

```
abstract (1.0.0)
actionmailer (3.0.0, 2.3.5, 2.3.2)
actionpack (3.0.0, 2.3.5, 2.3.2)
activemodel (3.0.0)
activerecord (3.0.0, 2.3.5, 2.3.2)
activeresource (3.0.0, 2.3.5, 2.3.2)
activesupport (3.0.0, 2.3.5, 2.3.2)
arel (1.0.1)
builder (2.1.2)
bundler (1.0.0)
erubis (2.6.6)
fastthread (1.0.7)
i18n (0.4.1)
mail (2.2.5)
mime-types (1.16)
mysql (2.8.1)
passenger (2.2.15)
polyglot (0.3.1)
rack (1.2.1, 1.0.1)
rack-mount (0.6.13)
rack-test (0.5.4)
rails (3.0.0, 2.3.5, 2.3.2)
railties (3.0.0)
rake (0.8.7, 0.8.3)
rubygems-update (1.3.7)
thor (0.14.0)
treetop (1.4.8)
tzinfo (0.3.23)
```

environment.rb using rails 2.3.5. This is the error when trying to access the landing page:

```
I18n::MissingInterpolationArgument in Welcome#index
```

Showing app/views/news/_news.rhtml where line #6 raised:

```
missing interpolation argument in "%m{%count}%Y %I:%M %p" ({}:object=>Fri Oct 30 13:37:57 -0700 2009) given)
```

Extracted source (around line #6):

```
3: <%= "#{1(:label_x_comments, :count => news.comments_count)}" if news.comments_count > 0 %>
4: <br />
5: <% unless news.summary.blank? %><span class="summary"><%=h news.summary %></span><br /><% end %>
6: <span class="author"><%= authoring news.created_on, news.author %></span></p>
```

Trace of template inclusion: app/views/welcome/index.rhtml

```

#5 - 2010-09-14 22:54 - Felix Schäfer

- Status changed from New to Closed

Just covered that in the forums: <http://www.redmine.org/boards/2/topics/16568#message-17334>. In short: i18n broke compatibility from 0.3 to 0.4, get rid of 0.4.1 and install 0.3.7.

#6 - 2010-09-14 23:54 - Mezz Anon

- Status changed from Closed to Reopened

Thanks Felix.

The original problem of HTML in the Target Version still exists however and it looks like the gems are correct:

```
abstract (1.0.0)
actionmailer (2.3.5, 2.3.2)
actionpack (2.3.5, 2.3.2)
activerecord (2.3.5, 2.3.2)
activeresource (2.3.5, 2.3.2)
activesupport (2.3.5, 2.3.2)
arel (1.0.1)
builder (2.1.2)
bundler (1.0.0)
erubis (2.6.6)
fastthread (1.0.7)
i18n (0.3.7)
mail (2.2.5)
mime-types (1.16)
mysql (2.8.1)
passenger (2.2.15)
polyglot (0.3.1)
rack (1.2.1, 1.0.1)
rack-mount (0.6.13)
rack-test (0.5.4)
rails (2.3.5, 2.3.2)
rake (0.8.7, 0.8.3)
rubygems-update (1.3.7)
thor (0.14.0)
treetop (1.4.8)
tzinfo (0.3.23)
```

#7 - 2010-09-15 00:01 - Felix Schäfer

Mmh, can't say for sure what goes wrong there. What does the HTML look like around that, does the selection list work (i.e. can you set a version from that page)?

I might be the form builder gets tangled up because the versions "look like" FixNums, could you try either changing the name of one or both versions to something that doesn't look like a number, and/or to add one version that isn't a number?

#8 - 2010-09-15 00:14 - Mezz Anon

Scratch that - I did a fresh checkout of [r3559](#) and everything is in order. Thanks for your help.

#9 - 2010-09-15 00:26 - Felix Schäfer

- Status changed from Reopened to Closed

Good to hear :-)
