

Redmine - Defect #639

Email notification of updated depend issues have bad links

2008-02-12 17:45 - Thomas Lecavelier

Status:	Closed	Start date:	2008-02-12
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description			
I just receive an email notification of #443, which was declared dup of #556. In the notification mail, the URL linked to #556 was http://issues/show/556 instead of http://*www.redmine.org/projects/redmine/**issues/show/556			
It's a view problem :)			
Related issues:			
Is duplicate of Redmine - Defect #201: Bug in email report: missing host name...			Closed

Associated revisions

Revision 1161 - 2008-02-17 15:17 - Jean-Philippe Lang

Fixes:

- email notifications: host name is missing in generated links (#639, #201)
- email notifications: referenced changesets, wiki pages, attachments... are not turned into links (only ticket ids are)
- attachment links and inline images don't work in issue notes

History

#1 - 2008-02-12 17:51 - Thomas Lecavelier

Correction: it was not an automatic notification from redmine, but a free comment from *Jos Yule* in the issue #443. See its comment (<http://www.redmine.org/issues/show/443#note-10>).

The problem resenteded:

A reference to an issue in the redmine issue interface is Ok, but when redmine notify the new comment by mail (HTML format), the server + project part of the URL is missing.

(I bet that my references to #443 here will fall in the same issue once notified by mail).

#2 - 2008-02-17 15:18 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Fixed in [r1161](#).
