Redmine - Feature #6394

Add Salt to Authentication

2010-09-14 21:30 - Eric Thomas

Status:	Closed		**Start date:**	2010-09-14
Priority:	Normal		**Due date:**

Target version:				
Resolution:				

Description
The passwords in the redmine database are hashed, but a salt is not added. If a database is compromised, one could run a rainbow attack and could potentially deduce a username's password.
