Redmine - Feature #6426
MenuManager::MenuItem should support a named route as a url
2010-09-17 20:21 - Eric Davis

Status: Closed
Priority: Normal
Assignee: Jean-Philippe Lang
Category: Code cleanup/refactoring
Target version: 3.0.0
Resolution: Fixed

Description
Instead of having to always use the controller/action/id hash for a menu item, a resource route should also be allowed.

## init.rb for menus

### Old way

```ruby
{ :controller => 'contracts', :action => 'show', :id => contract.id, :project_id => project }
```

### New way

```ruby
contract_path(project, contract)
```

Might need to add some more modules/helpers into Redmine::Plugin or MenuItem.

Revision 13765 - 2014-12-14 22:46 - Jean-Philippe Lang
Support for named route in project menu and a new :permission option (#6426).
