

Redmine - Defect #6435

Links to wikipages bound to versions do not respect version-sharing in Settings -> Versions

2010-09-20 05:03 - Mischa The Evil

Status:	Closed	Start date:	2010-09-20
Priority:	Normal	Due date:	
Assignee:	Mischa The Evil	% Done:	100%
Category:	Roadmap	Estimated time:	0.00 hour
Target version:	1.0.3	Affected version:	
Resolution:	Fixed		
Description			
<p>While reviewing the implementation for issue #4416 I noticed that the links to wikipages bound to versions do not respect version-sharing (introduced in r3123 for issue #465 and enhanced with r3133 for issue #4357) in Settings -> Versions.</p> <p>This leads to incorrect links when the version does not belong to the current project. More specifically, the links always point to the current project wiki instead of the wiki of the actual versions project.</p> <p>Another side-effect is that in the unless-statement again only the current project wiki is checked for existence instead of the actual versions project wiki.</p>

Revision 4307 - 2010-10-30 00:40 - Jean-Baptiste Barth

Fix wikilinks in project > settings > versions and version view. #6435 #4416

Contributed by Mischa The Evil and Felix Schäfer.

History

#1 - 2010-09-20 05:44 - Mischa The Evil

- File [6435-fix_links_to_wikipages_with_version-sharing.diff](#) added

I've fixed this by wrapping [source/trunk/app/views/projects/settings/_versions.rhtml#L20](#) into a basic if-else structure (checking for `version.project == @project`) and adding a modified else-case statement (added `:id-param` containing `version.project-value` and changed unless statement to check `version.project.wiki.nil?` instead of `@project.wiki.nil?`).

Here follows my patch (which also "fixes" two coding-standard inconsistencies (my third and fourth change)) which I'll attach separately also:

```

iki.titleize(version.wiki_page_title)) unless version.wiki_page_title.blank? || version.project.wiki.nil? %>
+     <% end %>
+   </td>
+   <td class="buttons">
+     <% if version.project == @project %>
-     <%= link_to_if_authorized l(:button_edit), (:controller => 'versions', :action => 'edit', :id =
> version ), :class => 'icon icon-edit' %>
+     <%= link_to_if_authorized l(:button_edit), (:controller => 'versions', :action => 'edit', :id =
> version), :class => 'icon icon-edit' %>
+     <%= link_to_if_authorized l(:button_delete), (:controller => 'versions', :action => 'destroy', :i
d => version), :confirm => l(:text_are_you_sure), :method => :delete, :class => 'icon icon-del' %>
+     <% end %>
-   </td>
+ </td>
+ </tr>
+ <% end; reset_cycle %>
+ </tbody>

```

As visible from my 1st change it is required in Redmine now to always show the Wikipage heading because of that it is possible that inherited versions contain bound wikipages while the current projects wiki does not exist.

#2 - 2010-09-20 05:48 - Mischa The Evil

Added relation to issue [#4416](#) cause of its similarity regarding the scoping of links (started by Jean-Baptiste Barth in [note-6](#)).

#3 - 2010-10-02 01:18 - Eric Davis

- Category changed from Projects to Roadmap
- Target version set to 1.0.3

#4 - 2010-10-27 20:06 - Felix Schäfer

Included in a fix for [#4416](#). I didn't take the if-block though, as it seems superfluous.

#5 - 2010-10-30 00:35 - Jean-Baptiste Barth

- Status changed from New to Resolved
- Assignee set to Mischa The Evil
- % Done changed from 0 to 100
- Resolution set to Fixed

Fix applied in [r4307](#), thanks Mischa & Felix.

#6 - 2010-11-01 01:22 - Eric Davis

- Status changed from Resolved to Closed

Merged into 1.0-stable for release in 1.0.3
