

Redmine - Feature #6439

Custom queries - option to have Filters collapsed initially

2010-09-20 13:08 - Robin McKenzie

Description			
Could we have an option in Custom Queries to have the Filters section initially collapsed when running them?			
I use Custom Queries a lot, but I have to collapse the Filters section every time I run it, because it takes up half the screen.

I think this (collapsed filters) has been the default for some time already, what version of redmine are you using?

How do I find out? I'm a user, not a sysadmin.
