Estimated time:0.00 hour

Affected version:

Description

The issues feed is broken in cases where there are custom fields defined.

Error:

ActionView::TemplateError: undefined method `format_value' for #<ActionView::Base:0x7aa4d88>;

Relevant backtrace:

- "On line #23 of app/views/journals/index.rxml"

- "20: xml.content \"type\" => \"html\" do"

- "21: xml.text! ''"

- "22: change.details.each do |detail|"

- "23: xml.text! '' + show_detail(detail, false) + ''"

- "24: end"

- "25: xml.text! ''"

- "26: xml.text! textilizable(change, :notes, :only_path => false) unless change.notes.blank?"

- app/helpers/issues_helper.rb:134:in `show_detail'

A patch is attached. Please check and commit.

History

#1 - 2010-09-25 17:25 - Jan from Planio www.plan.io

this is an easy one, would be great if it made it into 1.0.2

#2 - 2010-10-16 01:35 - Eric Davis

- Status changed from New to Closed
- Resolution set to Cant reproduce

I can't reproduce this. Can you post the full stacktrace with the params used or include a failing test in your patch?
