Please use english on this tracker, I don't think we much chinese-speaking people around who could help you.

Please also see [SubmittingBugs](#) about the information we need from you, particularly: what redmine and what rails and rack versions, what operating system, what have you tried already, what installation guide have you followed, and so on.

#2 - 2010-10-05 09:35 - Yan Ning

if use ruby script/server have this problem

<internal:lib/rubygems/custom_require>:29:in 'require': -- no such file to load -- script/../config/boot (LoadError) from <internal:lib/rubygems_custom_require<:29:in 'require' from script/server:2:in '<main>'
