Category:	Gantt		**Estimated time:**	0.00 hour
Target version:	1.2.0			
Resolution:	Fixed		**Affected version:**	

Description

Following some testing of the new Gantt chart implementation (Feature #6276), which is a huge improvement by the way, I noticed that if a sub-project has issues assigned to a version from a parent project (or another ancestor up the hierarchy) then said version (and associated issues) are not shown on the gantt chart for the sub-project.

The roadmap tab handles this situation correctly and it would make sense for the gantt chart to function in a similar fashion.
