Redmine - Defect #6625

Attachments lost when activity field error occures

2010-10-11 15:09 - Maxim Strukov

Status:	Closed		**Start date:**	2010-10-11
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Attachments		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	1.0.2

Description
If there is activity field error (set Timelog, but not set Activity type) Redmine does not save attached files and I need attach it once again.

History

#1 - 2010-10-11 19:29 - Holger Just

This was introduced in [r3305](#).

I think it is rather hard to really say which of the two cases is better:

- throw the file away and thus have atomic update operations
- attach the file nevertheless the other fields are invalid

The second case is better for larger files where uploading can take some significant time, the first case fits the currently designed workflow better, where we have atomic operations everywhere in Redmine.

#2 - 2010-10-12 08:10 - Maxim Strukov

Redmine can check the field before sending to the server without reloading page? In this case file will still not loaded, but already choosed and ready for upload.

#3 - 2011-07-12 17:03 - Etienne Massip

- Category set to Attachments

#4 - 2012-01-10 17:33 - Peter Englmaier

This issue seems not to be worked on and is still present in Redmine 1.2.2.stable.7811.

Please add the issue to the 'Candidate for next minor release' list!

#5 - 2015-03-08 04:54 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

Probably implemented in [r10977](#) and 10977 (Redmine 2.3).
In current versions, attachments are kept even after validation errors.
