## History

---

### #1 - 2010-10-11 18:37 - Holger Just

- *Priority changed from High to Normal*

Make sure you have set `l18n.default_locale = 'en'` in the first line `config/initializers/30-redmine.rb`. This sets the default locale if it can not be discovered by other means (user preference or browser information).

A default Redmine always falls back to the English (US) locale. A locale of nil should never happen anywhere.

### #2 - 2013-01-15 11:45 - Daniel Felix

- *Status changed from New to Closed*

- *Resolution set to No feedback*

I'm closing this one, due to the age of this issue and the missing feedback on this.
