Redmine - Feature #6639

custom fields missing in time reports

Description

I've added some custom fields to time registration that we found useful:

```
- Location (List: [On-site, Remote, Hands-off])
 - Hours (out of the total) spent on driving to/from location
 - Hours (out of the total) spent outside office hours
```

Plus a couple others which are less relevant to this issue.

The problem is that I would like to generate reports that also include these fields, but the reporting page seems to only include built-in fields :-(.

I'd like to request that custom fields be added to the relevant drop-down boxes in the reporting facility.

I am willing to put hours into this myself, given that you guys can find someone to provide me with a bit of guidance.
