Description

Hi,
I have done an Import from my Mantis Database.
The Problem is that the ticket Numbers in redmine [1144]
are now different from the ones in the Mantis Bugtracker.

The Mantis importer says:
Bugs: 2331/2331
After that I have 2331 Tickets in redmine,
but my Mantis Bugtracker contains 2342 Tickets.
So there are 11 Tickets Missing...

History

#1 - 2008-02-14 19:06 - Sven Schuchmann

Hi,
just analyzed my database and it seems that someone
deleted the 11 tickets directly from the database.
(the database is 4 years old and I took it over 2 years ago)
I will enter the 11 dummy tickets and try to import again...

#2 - 2008-02-15 16:51 - Sven Schuchmann

Okay, here is what I did: I added 11 tickets in redmine
and changed the "id" field in "mantis_bug_table" to the gaps.
But: They were still imported with the wrong numbers.

So I patched the importer "migrate_from_mantis.rake".

I changed the line:

```
MantisBug.find(:all).each do |bug|
```

to:

```
MantisBug.find(:all, :order => 'id ASC').each do |bug|
```

And they all got imported correctly... Ticket can be closed!

#3 - 2008-02-15 17:42 - Jean-Philippe Lang

- Status changed from New to Closed

I made a small fix to the Mantis importer in r1146 so that it preserves Mantis bug ids, even if you have deleted some bugs.
