

Redmine - Defect #6671

In version detail page of a project that has sub-projects when you click on a category of a sub-project it opens a wrong page

2010-10-14 13:41 - Ehsan Afzali

Status:	New	Start date:	2010-10-14
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description In the version detail page of project with sub-projects for example 'http://redmine.example.org/projects/parent-project/versions/1' in the 'Issues by category' section it shows all categories of sub projects. But they link to the parent project issue list instead of their own projects. For example if you have a catgory 'A' for version '1' of Project 'sp1' that is sub-project of 'parent-project' the links of 'A' hyperlink in 'Issues by category' is 'http://redmine.example.org/projects/parent-project/issues?category_id=1&fixed_version_id=1&set_filter=1' instead of 'http://redmine.example.org/projects/sp1/issues?category_id=1&fixed_version_id=1&set_filter=1' because the 'parent-project' does not have 'A' category with id '1' and so it shows all issues for that version instead of showing just issues of that category.			

History

I've forgot to say that the version 1 must be shared with the sub-projects. At least I've seen this on this condition.
