Resolution:	Invalid		**Affected version:**	

Description

Hello,
How can I control what content in an issue,
is visible to everyone ?
and how can i block from someone to view some content i entered in an Issue?

Generaly, how can I control who can view some content in an Issue?

Thanks alot
Adam

History

#1 - 2010-10-20 11:59 - Holger Just

- Status changed from New to Closed

- Priority changed from Urgent to Normal

- Resolution set to Invalid

You can't state for each field who can see it. Currently, you can have people see either all issues in a project or none. There is some discussion revolving around private issues (see #337and related).

Also, for configuration questions (that includes followups to this issue), please use the forums and not this tracker.
