Redmine - Defect #6740

Max attachment size, incorrect usage of 'KB'

2010-10-25 15:20 - Anonymous

Status:	Closed		**Start date:**	2010-10-25
Priority:	Normal		**Due date:**	2010-11-26
Assignee:	Azamat Hackimov		**% Done:**	100%
Category:	Translations		**Estimated time:**	0.00 hour
Target version:	1.0.4			
Resolution:	Fixed		**Affected version:**	1.0.3

Description
When I came to change the maximum attachment size, I was confused about the 'KB' prefix used, since 'KB' is not a standard prefix for anything. After doing some quick calculations I actually found out that this field is kilobytes, which is the SI decimal prefix 'kB'. It would be good if this could be changed from 'KB' to 'kB' to stop confusion, and so we actually know what this fields value is representing.

Are we sure this was fixed? I'm running 1.0.3.stable.4387 and yet I'm still seeing 'KB' instead of 'kB'.

#5 - 2010-11-07 18:05 - Holger Just

It was merged in r4335.

Sure, that doesn't mean it's fixed though and I can confirm this isn't. The 'KB' is hard coded into 'app/views/settings/_general.rhtml' ;)

Just wondering if someone could give a response as to the status of this.
