

Redmine - Defect #6752

Warning: Gem::Dependency#version_requirements is deprecated and will be removed on or after August 2010. Use #requirement

2010-10-27 16:06 - Be Fio

Status:	Closed	Start date:	2010-10-27
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:		Affected version:	1.0.2
Resolution:			
Description			
I'm getting this error in my default Apache error log.			
<pre>/public_html/vendor/rails/railties/lib/rails/gem_dependency.rb:119:Warning: Gem::Dependency#version_requirements is deprecated and will be removed on or after August 2010. Use #requirement</pre>			
Using::			
Redmine 1.0.2			
Rails 2.3.5			
MySQL 5.1.49			
Phusion passenger 2.2.11			
Ruby 1.8.7.299			

History

#1 - 2010-10-27 19:16 - Jean-Baptiste Barth

- Priority changed from Normal to Low

If I remember correctly it's due to the way Rails 2.3.5 manage its gems, not related to Redmine specifically. We decided to keep Rails 2.3.5 until 1.1.0 release (planned for the end of 2010), then switch to the latest Rails 2.3.x branch, which may solve the issue. Can you tell us your rubygems version ?

#2 - 2010-10-27 20:53 - Be Fio

I figured it was possible it wasn't Redmine related, but you never know.

My rubygems version is 1.3.7

#3 - 2010-10-27 22:27 - Jean-Baptiste Barth

- Category set to Code cleanup/refactoring

- Status changed from New to Closed

Thanks. I've heard they'll remove it for rubygems 1.4 but I cannot find a pointer to this anymore... The warning has been fixed in more recent Rails 2.3.x versions (see [the ticket on lighthouse](#) and [the related commit](#))

I close this issue, it will be solved *de facto* when we'll upgrade Rails after Redmine 1.1.0 release. Thanks for the bug report anyway.
