

Redmine - Defect #6764

NoMethodError in Projects#settings

2010-10-28 01:06 - Mezz Anon

Status:	Closed	Start date:	2010-10-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Projects	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Cant reproduce		
Description			
When viewing the Settings for a project I'm getting this error:			
NoMethodError in Projects#settings			
Showing app/views/projects/settings/_members.rhtml where line #3 raised:			
undefined method `<=>' for nil:NilClass			
Extracted source (around line #3):			
1: <%= error_messages_for 'member' %>			
2: <% roles = Role.find_all_givable			
3: members = @project.member_principals.find(:all, :include => [:roles, :principal]).sort %>			
4:			
5: <div class="splitcontentleft">			
6: <% if members.any? %>

Using r3559 .			
Only one project is affected, other project settings can be viewed/modified without issue.			

History

#1 - 2010-10-28 11:22 - Felix Schäfer

It seems your DB is corrupted. Have you removed users from the DB by hand?

#2 - 2010-10-28 17:36 - Mezz Anon

I didn't think so, however I just checked the users table and there is an id increment missing so it looks to be the case. I went through all tables and found a single record the for the missing user_id under the member_roles table. Other than that the id was not linked to any other records as either user_id or author_id.

Is there a way to get this working?

#3 - 2010-10-28 19:46 - Felix Schäfer

Have a look at what project the entry in member_roles points to, and if it's the same project you are getting the error in it probably is safe to delete it (make backups, and so on!) and that should get you a consistent state again.

#4 - 2010-10-28 20:58 - Mezz Anon

Turns out an active user had no role set for the project, which can be set under Users->Projects. After removing the user from the project (assigning a role also worked) the settings page loaded fine.

#5 - 2010-10-28 21:06 - Felix Schäfer

- Status changed from New to Closed
- Resolution set to Cant reproduce

Great, thanks for the feedback.
