Make sure you use rails 2.3.5.

#3 - 2010-10-30 12:20 - Felix Schäfer

Did using rails 2.3.5 solve the problem for you?

#4 - 2010-10-30 13:48 - Jesse Armand

Hmm no.

Because I need to use thin and rails 2.3.8, and rails 2.3.5 is dependent on rack 1.0.1, so I decided to do this:

I use rails 2.3.8, and I use Bundler to load i18n gem version 0.3.7. Because the problem is only about that the deprecated syntax detected in i18n gem.

It works as far as I see.

#5 - 2010-10-30 14:59 - Felix Schäfer

Jesse Armand wrote:

It works as far as I see.

There are other places known to break with rails 2.3.8, IIRC some drop-downs and stuff like that. Freeze rails 2.3.5 to your redmine and use that instead, rack 1.0.1 is needed too (don't know if using a newer version breaks stuff though).

#6 - 2010-10-30 16:13 - Jesse Armand

In that case, I will use mongrel for this or something that doesn't load the latest rack.

Thin is always loading the latest rack. I don't know how make it to use a specific version of rack.

Unless if I uninstall rails 2.3.8 and rack 1.1.0, or anything newer than 2.3.5.

- Status changed from Closed to Reopened

Same problem occurs when newer version of i18n gem was installed in system. Problem in rails ActiveSupport/lib/active_support/vendor.rb It defines required version of i18n too loose and this causes problem:

```
begin
  gem 'i18n', '>= 0.1.3'
rescue Gem::LoadError
  $:.unshift "#{File.dirname(FILE)}/vendor/i18n-0.1.3/lib"
end
```

Simple solution is to change version to more exact:

```
begin
  gem 'i18n', '~> 0.1.3'
rescue Gem::LoadError
  $:.unshift "#{File.dirname(FILE)}/vendor/i18n-0.1.3/lib"
end
```

This is known, solved in [#6428](#) and has nothing to do with the OPs report, please open a new issue if you feel this is still a problem.
