Description I like how the new redmine lets you group the queries by tracker, but it would be great if you could group by parent task and show the sub-task under it, or if there is a ticket that is a parent with sub-task to show a plus sign that would display the sub-task tickets underneath when clicked.			
Related issues: Is duplicate of Redmine - Feature #6116: Group sub-tasks with parent on issue... <div>New2010-08-12</div>
