

Redmine - Defect #6843

REST API Does Not Include Target Version

2010-11-07 05:48 - Jeremy Walker

Status:	Closed	Start date:	2010-11-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	2.00 hours
Target version:		Affected version:	1.0.1
Resolution:	Cant reproduce		
Description			
The REST API for issues does not include the target version of the issue. This is a surprising omission given that the XML returned for issues contains just about everything else available on the normal issues page.			

History

#1 - 2010-11-07 13:20 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Cant reproduce

In trunk and 1.0.1, the target version is present in /issues.xml and /issues/1.xml.

See:

- [source:/tags/1.0.1/app/views/issues/index.xml.builder#L13](#)
- [source:/tags/1.0.1/app/views/issues/show.xml.builder#L11](#)

Note that the tag is omitted if target version is not set.

#2 - 2010-11-08 07:29 - Jeremy Walker

Ah sorry, my mistake (must have had some un-versioned records without realizing it).

#3 - 2010-11-08 18:06 - Jeremy Walker

Stupid question though: why is it called "fixed_version" in the API (even for issues with status New, which clearly aren't fixed), but "target version" (which makes much more sense universally) in normal Redmine?

#4 - 2010-11-08 18:30 - Jean-Philippe Lang

"Target version" is the new display name for this property, but it's still named fixed_version internally and thus in the API.

#5 - 2010-11-08 19:45 - Jeremy Walker

Ahhhh
