

## Redmine - Feature #6846

### Add VIM-like keyboard shortcuts

2010-11-08 01:26 - David Petersen

<b>Status:</b>	New	<b>Start date:</b>	2010-11-08
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	UI	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Unplanned backlogs		
<b>Resolution:</b>			
<b>Description</b> It would be very sweet to be able to navigation the issues list from the keyboard. examples:  j: down k: up o: open/view issue x: select issue (allowing for multiple issue selection) ?: show keyboard shortcut help  I am sure there are more that would be helpful

Kind of. But here we're speaking about javascript based shortcuts that do not require using Ctrl/Alt/Shift keys like regular html accesskeys.

##### #4 - 2011-03-15 18:31 - Steve Koppelman

Shortcuts assigned to unmodified keys would also have the advantage of being likely to work on OS X instead of being overridden by system keybindings. :)

##### #5 - 2011-11-11 16:11 - Austin Smith

I've implemented these shortcuts in a plugin: [https://github.com/netaustin/redmine\\_keyboard\\_shortcuts](https://github.com/netaustin/redmine_keyboard_shortcuts)

It still needs testing, but it supports these features and more in Chrome and FF.

##### #6 - 2011-12-09 22:39 - Brian Jacobi

Anyone test this yet? When we POC'ed Jira, users really liked having the shortcuts available

##### #7 - 2012-05-10 05:55 - Steven Wong

that's it .i used for firefox.

but it could not support the internet explorer.

+1 for adding this feature. Redmine is missing this key feature which is now becoming quite hot, and time is ticking.

**#9 - 2014-02-09 22:46 - Anonymous**

+1

**#10 - 2014-05-08 02:02 - Szabolcs Szasz**

Would be nice to rename this issue, and the related plugin, to "VIM-like" shortcuts. (Or, better yet (but harder): shift the focus explicitly toward *customizable* shortcuts.)

Most of those, who also desperately need keyboard shortcuts *in general* for Redmine, but come (e.g. here, via Google) from all the various other directions than vi, may feel a bit puzzled about why "the" keyboard shortcuts feature of Redmine should mean e.g. "k" for up and "j" for down. ;) Cheers!

**#11 - 2014-06-04 01:44 - Toshi MARUYAMA**

- *Subject changed from Add keyboard shortcuts to Add VIM-like keyboard shortcuts*

Done.

**#13 - 2017-11-09 02:45 - Mischa The Evil**

- *Has duplicate Feature #27401: Switch from View ticket to Edit Ticket - hit the button E on your keyboard added*
