

Redmine - Defect #6853

Ruby 1.9: translation missing: en, field_lock_version (ruby 1.9.1)

2010-11-08 22:32 - Kioma Aldecoa

Status:	Closed	Start date:	2010-11-08
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Ruby support	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description			
I'm seeing the same issue reported in #3004 in the 1.0.1 release, but with ruby 1.9.1 which i know isn't fully supported.			
Here is the HTML:			
<pre><label for="issue_lock_version">translation missing: en, field_lock_version</label><input id="issue_lock_version" name="issue[lock_version]" type="hidden" value="1" /></pre>			
It shows up reliably after clicking to update an issue.			
Temporarily worked around by adding blank translation for issue_lock_version.
