Redmine - Defect #6857

git references leaking from subproject to project

2010-11-09 10:08 - Bernhard Furtmueller

Status:	New		**Start date:**	2010-11-09
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:	Candidate for next minor release			
Resolution:			**Affected version:**	1.0.3

Description

Since redmine can't share repositories to subprojects yet we added the repository twice (to project and subproject).

Now trackers which are referenced in the repository get commit messages attached twice. One time from the project's repo and one time from the subproject's repo.

I'd consider this leaking a bug (or a first step to shared repos ;))

History

#1 - 2010-11-09 10:15 - Bernhard Furtmueller

I think there were already some attempts getting the root problem (sharing repos) fixed or asked.

Feature #1657 Subprojects can share their parent project's repository
Patch #2144 Patch for main-level repository
Patch #2256 Allow commit messages to refer to issues in project ancestor tree, not just project

#2 - 2011-08-24 09:17 - Etienne Massip

- Target version set to Candidate for next minor release

Yet to be confirmed.

#3 - 2011-12-21 17:40 - Mischa The Evil

I haven't looked into this issue deeply but considering r3357 for issue #4674, which was included first in Redmine 0.9.2, it looks like it is logical behavior.

#4 - 2012-09-14 19:59 - Fernando Hartmann

+1
This happens to me too

#5 - 2013-03-02 08:24 - Ivan Cenov

This happens in 2.2.3.stable too with Subversion repositories.

#6 - 2013-04-19 07:04 - Jethro Yu

This happens in 2.2.3.stable too with git repositories.

#7 - 2013-11-27 14:56 - Ralph Twele

I have this happening with 2.3.0. It is not only related to parent-child Projects. I have one repository containing a document describing general development rules. This is included in many Redmine projects. If I commit a change to the document referencing a ticket the new revision will be listed in the ticket multiple times.

#8 - 2016-01-17 05:53 - Go MAEDA

- Has duplicate Defect #5126: Associated revision shown multiple times added

#9 - 2019-10-06 03:40 - Go MAEDA

- Has duplicate Defect #32191: Duplicate associated revisions when using multiple repositories for a project added
