

Redmine - Patch #6864

Support of mail notification for changesets

2010-11-11 01:35 - Xiwen Cheng

Status:	New	Start date:	2010-11-11
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:			
Description			
<p>This patch closely resembles the traditional subversion hooks. The main difference is the recipients list is integrated with redmine: author exclusion and permissions. And maybe other SCM's also (tested with SVN).</p> <p>I have tested it with plain text only, the html template needs improvements (render difference for instance).</p> <p>TODO: ability to turn this off in project settings.</p>

Nice one, I will definitely give it a try. I am using the traditional svn hooks right now. Maybe it's worth to try to put this into a plugin? I'll give it a try, as time allows me to do so :-)

That's a good idea. I will see if I can get it sorted out.
