Redmine - Defect #6874

API should return XML description when creating a project

2010-11-12 09:32 - Grigory Petrov

Status:	Closed		**Start date:**	2010-11-12
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	REST API		**Estimated time:**	1.00 hour
Target version:	1.0.4			
Resolution:	Fixed		**Affected version:**	1.0.3

Description

Create issue API (POST /issues.xml) returns XML description of created issue with issue ID that can be used to modify created issue.
Create project API (POST /project.xml) has same syntax and behaviour but don't return anything, so API user don't know project ID and can't work with created project.

I'm using remote API for automating some Redmine interactions and returning project ID for "create project" API call will allow me to do much more things with redmine.
