Description

When setting up a filter, I can filter for issues that are assigned to any project member. There's even a special <<me>> item I can use to filter for issues assigned to myself. But there doesn't seem to be a way to filter for issues that are not assigned to anyone. It seems that a second special item, perhaps called <<nobody>> would do the trick.

Thanks for considering this request, and thanks once again for making such a terrific tool available!

- Status changed from New to Closed
- Resolution set to Invalid

Choose "none" is the operator list (not the user list), instead of "is".
