

Redmine - Defect #6917

respond_to_without_attributes? does not work from runner

2010-11-16 20:20 - Bart Vanbrabant

Status:	Closed	Start date:	2010-11-16
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Cant reproduce		

Description

If have written a script that is executed with the ruby on rails runner. This script requires all repositories (which can be hg, svn or git in my setup). When a iterate over all repositories it gives an exception on the first git repository. This occurs because `respond_to_without_attributes?` is not defined on git instances. This only occurs in the runner, not in the a plugin.

I can work around this by wrapping lines 1652 to 1660 with

```
if object.respond_to? :respond_to_without_attributes?
```

The side-effect of this workaround is that the type of the git repository objects is not `Repository::Git` such as `Repository::Mercurial` but just `Git`.

History

#1 - 2010-11-16 20:24 - Bart Vanbrabant

Sorry. The version is 1.0.2 and this file I mentioned is `vendor/rails/activerecord/lib/active_record/base.rb`

#2 - 2024-09-19 15:14 - Holger Just

- Status changed from *New* to *Closed*

- Resolution set to *Cant reproduce*

Iterating over all defined repositories appears to work fine when starting a console (or runner).

If you still experience this error, please provide more details which allow us to reproduce this with a current version of Redmine.
