Description

In this article: http://www.redmine.org/wiki/redmine/RedmineCustomFields
we can find following description of Redmine functionality:

> Data in spent time entry custom fields can be used and/or will be displayed in the Timelog report.

I can't find this function in Redmine. Am I missing something or this function is not implemented?

I think this has been added in trunk but hasn't made its way to stable yet, sorry.

#2 - 2010-11-25 12:09 - Maciej Czub

I'm using trunk branch (1.0.3.devel.4425 at the moment) and I don't see it.

Nope, this feature has been available since Redmine 0.8. It was added in r1689, r1690 and r1691 for issue #772. Though, it has not been integrated completely; see below...

It is slightly more complicated; let me explain:

Because Redmine has two time-entry reports, each having multiple output-formats (HTML, CSV and ATOM), we have to describe them separately and more explicit.

RedmineTimelogDetails (AKA Spent-time details)

HTML

No STCF data is displayed.

CSV

All STCF data is exported.

ATOM

No STCF data is exported.

[RedmineTimelogReport](#) **(AKA Spent-time report)**

HTML

Some STCF data is displayed. Only data on STCF's of the **type** boolean and list can be used to *filter* the report.

CSV

Some STCF data is exported. Only data on STCF's of the **type** boolean and list is exported and this data is only *added* to the resulting CSV-file when the report is *filtered* using a filter containing data on STCF's of the **type** boolean and list.

ATOM

ATOM output is currently ***not available*** for the Spent-time report.

Some references to the related (duplicated) issues:

- Issue [#1692](#)
- Issue [#1766](#)
- Forum-message [Custom Fields vs Spent Time Reports](#)

Maciej: Looking at your initial request you are looking to get the STCF data on the [RedmineTimelogReport](#) (AKA Spent-time report), which leads to the conclusion that this issue is a duplicate of [#1692](#). Therefor I close this issue accordingly. Please reopen this issue elsewise...
