You seem to have some weirdness in your rails install, I think the failing Digest:Module is from when rails tries to generate a session cookie. Maybe you could google/investigate that way?

## #3 - 2010-11-29 12:27 - Pavel P

- Status changed from New to Resolved

Ruby enterprise installer for some reason didn't install correctly openssl native extension. Let's install it manually:

```
cd ~/ruby-enterprise-1.8.7-2010.02/source/ext/openssl
ruby extconf.rb
make install
```
