**Description**

With an administrator user, when i click "trackers", i've got a 404 error !

Page not found
The page you were trying to access doesn't exist or has been removed.

Windows
MySQL 5.1
ruby 1.8.7 (rubyInstaller)
redmine 1.0.3

## History

**#1 - 2010-11-26 13:42 - Felix Schäfer**

Please copy the error trace you get from log/development.log to here.

**#2 - 2010-11-27 14:51 - Jean Müller**

Sorry, you can reject it !
It's because of my Apache proxy :

- my sub-URI is /tracker and not default /redmine,
- My apache configuration is

```
ProxyPass /tracker/ http://127.0.0.1:3001/
```

  so when my url is https://my-server/tracker/trackers, it becomes http://127.0.0.1/s
- see the production.log:

```
Processing ApplicationController#index (for 192.168.0.254 at 2010-11-26 17:53:45) [GET]

I'm going to put default /redmine sub URI.

Jean
ActionController::RoutingError (No route matches "s" with {:method=>:get}):
Rendering G:/outils/redmine-1.0.3/public/404.html (404 Not Found)
```

**#3 - 2010-11-27 15:58 - Jean-Philippe Lang**

IMHO, it's more an apache configuration problem rather than a Redmine issue, isn't it?

**#4 - 2010-11-27 16:15 - Jean Müller**

It is !

**#5 - 2010-11-27 16:50 - Jean-Philippe Lang**

*- Status changed from New to Closed*

*- Resolution set to Invalid*

Thanks for the feedback.
