

Redmine - Feature #6995

multi-action with the context menu on a issue

2010-11-28 17:15 - Alexandre Jobin

Status:	New	Start date:	2010-11-28
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description If i want to do an update on issue by changing more than one properties with the context menu, i must 'reselect' the issues because after the first update, the page is loosing is position and the selected checkboxes are reseted. So it would be great to show the context menu and, for example, if i want to change the "% done" to 100% and also change the "status" to closed, to do it without closing the context menu and without resetting the selected checkboxes after each update.

Why don't you click Edit on the context menu and change "% done" and "status" on the bulk edit screen?

well, because i didnt tried that :)

but i think i should not loose my selection when i make an update via the context menu. And when i update something, the screen scroll to the top and it should not do that. It most stay where it is to not loose the focus of what we were doing. Only my opinion!

- *Category set to UI*

- *Priority changed from Normal to Low*

You should try :-)
