

Redmine - Defect #7

bad user submission returns application error.

2007-02-27 06:53 - Satoru KURASHIKI

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description When I tried to add New User with bad form(password less than 4 characters), I got this error: ---- GLoc::InvalidKeyError in Users#add Showing app/views/users/_form.rhtml where line #1 raised: Symbol or String expected as key. ---- I found this part received "activerecord_error_too_short4" symbol. (and guess it can't found that key at language.yml file.) my environment: trunk version of redMine on Windows sqlite3 with load_default_data

Right. I'll have a look at it asap.
Thanks

#2 - 2007-02-27 12:27 - Jean-Philippe Lang

I've just committed the fix in the trunk.
Thanks for your submission.

Jean-Philippe
