Target version:	Affected version:
Resolution:	
Description	
<p>When I tried to add New User with bad form(password less than 4 characters), I got this error:</p> <pre>----- GLoc::InvalidKeyError in Users#add Showing app/views/users/_form.rhtml where line #1 raised: Symbol or String expected as key. ----- I found this part received "activerecord_error_too_short4" symbol. (and guess it can't found that key at language.yml file.) my environment: trunk version of redMine on Windows sqlite3 with load_default_data</pre>

I've just committed the fix in the trunk.

Thanks for your submission.

Jean-Philippe

Right. I'll have a look at it asap.

Thanks
