Target version:			
Description			
<p>I use Redmine 1.04 from svn:branches/1.0-stable and I have error 404 when creating project. I do not know why, but the link to create a project: http://redminehost/project/add instead of the correct new.</p> <p>So, simply patch is add this line to /config/routes.rb:</p> <pre>+ project_views.connect 'projects/add', :action => 'new'</pre> <p>Patch is attached. If there is a correct bug fix - I will be happy. Maybe my useful to someone too.</p>

- Status changed from New to Closed

I think you're using a plugin that overrides the project view and uses the old params.
