<b>Description</b> First, thank you on the creation and maintenance of this tool. It has been very helpful.  I would like the export to cvs on issues lists to export all of the columns from the issue including custom columns. Since I and the person I am working with are using redmine as a front end to Microsoft project it would be nice to be able to import the estimated hours.  Also it is easy in a spreadsheet to remove extra columns so having more than I need is not a problems. The best of all possible worlds would be to be able to define the columns per project or tracker, but that may be more trouble that it is worth.  Thank you. Curt

- Category set to Issues

Estimated time was missing and is added to the csv export in [r1166](#).

Concerning custom fields, here are the rules:

- when exporting the issue list of a particular project, all the custom fields used by this project are exported
- when exporting the cross-project issue list, all the custom fields marked as 'for all projects' are exported

Which version are you using ?

Thank you for your prompt response.

I am on 1152. I just misunderstood the rules on the export. Thanks for clairifing it for me.

The estimated time in the export will be helpful. Thanks

Curt
